

ADULT SEPSIS

Triage Tool pilot- Clayton

Sepsis in adults should be considered if a patient meets **2 or more sepsis criteria and has a known or suspected infection.**

Sepsis criteria (2 or more)

- Heart rate >95 bpm
- Resp rate >22 bpm
- Systolic BP ≤100mmHg
- Change in mental status
- Neutropenia, recent chemotherapy, transplant or immunocompromised
- Temp <36°C or ≥38°C (oral or equivalent)

INFECTION
Known or suspected

If you recognise sepsis at triage, assign category 2 – Durapage using
“SEPSIS ALERT UR:”
